## **DETAILED ACTION**

### ***Response to Preliminary Amendment***

1. The preliminary amendment filed on 4/25/2001 is entered.

### ***Specification***

2. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

### **Arrangement of the Specification**

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or  
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.
  - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

### *Claim Objections*

3. Claims 3, 5-6 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Claims 3, 5, 6 fail to further limit the subject matter of claim 1 because claims 3, 5, 6 are apparatus claim which are dependent upon method claim 1.

4. Claims 1-12 are objected to because of the following informalities: improper use of word "the" throughout each claim instead of "a" because of lack of antecedence, incorrect word "emitter" in claim 8 ( page 2 of Preliminary Amendment). , incorrect word "comparation" in claim 9 ( page 2 of Preliminary Amendment). Appropriate correction is required.

### *Claim Rejections - 35 USC § 112*

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As to claim 1, it fails to clearly points out the subject matter as driving scheme for a matrix LCD display or LC element ( note that it is known a liquid crystal cell serves as switching element as to passing or blocking light ), how an alternating square wave signal is applied to said matrix LCD or LC element ( i.e. across pixel electrode/counter electrode), what specific method

steps to obtain the objective of optimum dynamics of the electrooptic response, how the time integral is within a predetermined interval because phrase (Vc1 less or equal time integral less or equal time Vc2 ) is incorrect due to lack of definition of terms Vc1 and Vc2, lack of logic relationship between voltages and time integral terms), how to determine the time interval for polarity change of driving signals, lack of concise definition of word "integrator" .

As to claims 2-12, numerous similar problems to claim 1 are found ; it is strongly recommended that all claims be redrafted.

No art is applied until the problems of claims 1-12 are resolved as mentioned above
